SKILLS

- **Backend:** .NET (C#), Go (learning), Python, PHP, Node.js.
- **API & Service Communication:** gRPC, REST, GraphQL.
- **Distributed Systems:** RabbitMQ, Redis.
- **Cloud/Infra:** Terraform, Docker, Cloudflare, CI/CD.
- **Monitoring & Observability:** Grafana, Splunk, ElasticSearch
- **Databases:** MS SQL Server, MySQL PostgreSQL.
- **Security:** secure coding, pentesting fundamentals, automation tooling.
- **Frontend:** TypeScript, React, Next.js.

LANGUAGES

- **Spanish:** Native speaker
- **English:** Full professional
- **Italian:** Elementary

Iván Franco Tassara

Senior Software Engineer

Software Engineer with 10+ years of experience building distributed, high-throughput backend systems. Strong in .NET, Go (learning), Python, Node.js, message queues, caching, and real-time architectures. Experienced with cloud technologies, Terraform, CI/CD, observability, and debugging complex distributed behaviors. Passionate about offensive security, secure-by-design practices, and systems-level problem-solving. Thrive in fast-paced, high-ambiguity environments and small high-impact teams.

WORK EXPERIENCE

Senior Software Engineer Jun 2022 - Present
Derivco Sports (Betway) | Barcelona

- Designed and maintained backend services in .NET for high-traffic sportsbook systems.
- Implemented distributed services using REST, GraphQL, and gRPC.
- Participated in multi-region platform migrations, improving reliability and scalability.
- Led IaC projects with Terraform and managed cloud configurations via Cloudflare.
- Improved performance and reduced operational issues through enhanced monitoring and debugging.
- Additionally contributed to high-performance UIs using TypeScript (React/Next.js) when needed, enabling smooth collaboration across backend, frontend, and product teams.

Staff Software Engineer Sep 2019 - Jun 2022
Betsson Group | Malta

- Built and optimized real-time distributed backend systems for sports data delivery.
- Implemented high-throughput workflows using RabbitMQ and Redis.
- Maintained low-latency live updates via Diffusion technology.
- Used Splunk for monitoring, observability, and incident response.

Co-Founder / Software Engineer Apr 2018 - Sep 2019
Tupaca | Buenos Aires

- Developed backend services with C#, PHP, microservices, and TDD.
- Supported engineering hiring and agile processes.

Professor (ASP.NET Core) Sep 2018 - Sep 2019
UTN | Buenos Aires

- Taught algorithms, data structures, C#, ASP.NET Core, Entity Framework, testing, and deployment.

Freelance Software Engineer Aug 2015 - Sep 2019
Selected Projects | Buenos Aires

- Video-conference platform (Symfony, MySQL).
- Billing & finance systems (C#, SQL Server).
- Management dashboards and data integrations.

Software Developer / Analyst Oct 2014 - Feb 2016
APG Consulting | Buenos Aires

- Built financial and traceability systems for enterprise clients using .NET and SQL Server.

Software Developer Jan 2013 - Oct 2014
APG Consulting | Buenos Aires

- Developed applications with .NET, PHP, NHibernate, Doctrine, and Symfony.

EDUCATION

Information Systems Engineer Mar 2009 - Dec 2014
UTN | Buenos Aires
